GROUP 2.2.2 Complete 2 courses		C S 474 - Introduction to Deep Learning	3.0		
MATH 213 - Elementary Linear Algebra	2.0	C S 479 - (Not currently offered) C S 486 - Verification and Validation	2.0		
MATH 215 - Computational Linear Algebra	1.0		3.0		
		C S 501R - Advanced Topics in Computer Science	3.0v		
		You may take up to 3 credit hours. C S 513 - Robust Control	3.0		
		C S 513 - RODUST CONTROL	3.0		

## BS in Computer Science (693220)

#### 2021-2022

### THE DISCIPLINE

Computer science touches virtually every area of human endeavor. Software is responsible for everything from the control of kitchen appliances to sophisticated climate models used in predicting future environmental change. Students in computer science learn to approach complex problems in business, science, and entertainment using their strong background in mathematics, algorithms, and data structures.

The degree programs in the Computer Science Department prepare students to be confident software developers and technical problem solvers. The curriculum also trains students for research into new avenues where computers will have a significant impact. The BS curriculum is accredited by the Computing Accreditation Commission of ABET.

#### **CAREER OPPORTUNITIES**

Graduates pursue exciting opportunities in graphics, artificial intelligence, software engineering, database design, scientific programming, systems administration, and research at universities and national laboratories.

Students completing the animation emphasis will be prepared for technical positions at animation and game programming studios. Students will learn both the technical and artistic side of creating and implementing digital animations and games.

The bioinformatics emphasis is designed for students who are interested in building software to assist in analyzing biological systems. Students will graduate with a significant background in biology coupled with the software development and analysis skills necessary to implement large bioinformatics applications.

#### MAP DISCLAIMER

While every reasonable effort is made to ensure accuracy, there are some student populations that could have exceptions to listed requirements. Please refer to the university catalog and your college advisement center/department for complete guidelines.
